MKKN LLC

Artillery Ammunition

155 mm artillery ammunition from MKKN LLC is a product MADE IN SAUDI ARABIA that can be used in many of currently used 155 mm guns and howitzers all around the world. The ammunition can be used against infantry, armored targets as well as against structures. MKKN offers wide variety of 155 mm ammunition for maximum flexibility and user comfort during training and operational use. In our portfolio we offer High Explosive projectiles of different types – standard M107 projectile, Our base bleed ammunition of types HE ER BB and HE ER FB BB ensure extended range of more than 30km.

The minimum fragment coverage area for the HE projectile is not less than 3000m² per projectile.

Fuze fulfils all NATO standards requirements for 155mm ammunition, but we are able to offer our customers other type of fuzes – proximity, time and multi-purpose.

Our projectiles can be supplied with wide variety of powder charges depending on the customers demand charges – M3A1, M4A2, M119, M203 as well as modern Bi-Modular charge system ensuring the best and most advanced firing capabilities.
